Southampton

Empowering Ambassadors of Good Practice

Introduction to the SSI and its Fellowship Programme

UK Research
and Innovation

Software Sustainability Institute

Community

Developing Communities of Practice by supporting the right people to understand and address topical issues

Training & Software

Helping the community build reliable, reproducible, and reusable software while delivering essential software skills to researchers

Policy & Research

Collecting evidence on and promoting the place of software in research and sharing these insights with a range of stakeholders

Events

Bringing the research software community together through events like the Collaborations Workshop and Research Software Camps

Communications

Leverage our platform to enable engagement, delivery and uptake of our activities, while also amplifying the good work of others

Software Sustainability Institute

Financial support

Receive £4000,- to organise or participate in workshops, training, and conferences. Fellows beyond year one can apply to the Development Fund

Mentorship Programme

Work with a professionally trained mentor to increase the impact of Fellowship plans, navigate career paths, and develop leadership skills

Engagement with the SSI Community and its events

Join monthly All Fellows Calls, Study Groups, Slack discussions, and the annual Collaborations Workshop and Software Camps

Fellowship Programme

“...improve and promote good computational practice across all research disciplines and support those who are doing this important work”

Cohort-based learning

Organise or participate in cohort-based learning with peers, fostering collaboration and knowledge exchange
